One device of your choice

CHOOSING A BUTTON

You can use any of the three buttons to activate your door. If you have multiple doors or an automated gate you may use one of the other two buttons to activate it, provided you have a compatible receiver. For further details please refer to our web page.

ADDING REMOTES MT SERIES

1. Press and hold the selected remote push button you wish to open the door.
2. Press and release the orange "Learn" button

(1) on the opener panel. The opener light will flash once. Release the remote push button. If no light bulb is installed, two clicks will be heard.

ADDING REMOTES MR SERIES

1. Press and hold the selected remote push button you wish to open the door, the orange LED will flash.
2. Press and release the purple "Learn" button (1) on the opener panel. The opener's courtesy LEDs will flash once. Release the remote push button.

If you release the remote control push button before the opener light or LEDs flash, the opener has not accepted the code.
FOR GATES SEE GATE USER MANUAL

To Erase All Programmed Remotes/Codes

Press and hold the "Learn" button (1) on the opener panel until the indicator light turns off (about 6-10 seconds).

**Note: This procedure erases all codes from the operators memory.**

. To add or re-program valid remotes into your opener, follow the procedure laid out in "ADDING REMOTES".

NOTE: FOR GATE MOTORS CONSULT OWNER'S MANUAL.

Replacing Batteries

Model C943/C940: Insert batteries 10A20 (CR2032) x2 positive side *up*.

Model C945: Insert 1x battery 10A20 (CR2032) positive side *up*.

To replace cover, snap shut along both sides. The lithium batteries should produce power for up to 5 years. To replace batteries, use a coin, the visor clip or screwdriver blade to pry open the case, as shown ("Open" location is stamped on back.)
